Kadod, Bardoli, Gujarat

SUMMARY

Full Stack Developer pursuing a Master of Computer Application with hands-on experience designing and building responsive, secure, full-stack web and mobile applications using the MERN stack, ASP.NET Core MVC, PHP, and Flutter. Skilled at translating requirements into working software through three end-to-end academic projects; a fast learner with strong analytical and problem-solving abilities .

EDUCATION

Master of Computer Application 2025 – 2027 (Pursuing)

Uka Tarsadia University — CGPA: 8.4

Bachelor of Computer Application 2022 – 2025

Uka Tarsadia University — CGPA: 7.3

Higher Secondary (XII) 2020 – 2022

Kadod High School

TECHNICAL SKILLS

Languages: Java, JavaScript, PHP, Python, Kotlin

Front-End: HTML5, CSS3, React.js, XML

Back-End: Node.js, Express.js, ASP.NET Core MVC, RESTful APIs

Mobile Development: Flutter, Android (Java/Kotlin)

Databases: MongoDB, MySQL, Firebase

Core Strengths: Team Management, Fast Learner, Analytical Problem-Solving

ACADEMIC PROJECTS

HomeServeX | *MongoDB, Express.js, React.js, Node.js*

- Engineered a full-stack home-service booking platform where customers browse and book services while providers manage bookings and assigned workers.
- Implemented secure online payment processing to support end-to-end transactions within the platform.
- Designed RESTful APIs and MongoDB data models to handle real-time booking and provider-management workflows.

Food Fusion | *Flutter, Firebase*

- Built a cross-platform recipe mobile app that lets users search recipes, view ingredients and cooking steps, and save favorites.
- Integrated Firebase authentication and cloud storage to support secure account management and data persistence.

Book Your Show | *PHP, HTML, CSS, JavaScript, XAMPP*

- Developed a movie ticket booking web application covering movie browsing, seat selection, and booking management.
- Designed an intuitive, easy-to-use interface to streamline the multi-step ticket booking process.
